It will not fail you!
"Our lack of community is intensely painful. A TV talk show is not community. A couple of hours in a church pew each Sabbath is not community. A multinational corporation is neither a human nor a community, and in the sweatshops, defiled agribusiness fields, genetic mutation labs, ecological dead zones, the inhumanity is showing. Without genuine spiritual community, life becomes a struggle so lonely and grim that even Hillary Clinton has admitted "it takes a village"."
How often our souls have pined for a house that is luxurious, which is one with nature, where chirping birds, colourful and exotic flowers give company, where life is unhurried, relaxed and soothing, where even the harsh sunlight is cooler – a house away from the intrusions of modernization and yet luxuriously comfortable and does not cost the earth and has like mined people as neighbours and community living is idealistically perfect.

And, if wishes were horses, they would be galloping to Vibez Farm House, built with a love for nature that is evident in the design and a commitment to preserve the natural unspoilt beauty of the place. These luxurious homes and Cottages are eco-friendly and an outcome of love for nature making Vibez Farm House the first, best and natural choice for vacationing.
We do not inherit the earth from our ancestors, we borrow it from our children.

~ Native American Proverb
A sprawling 30 acres of abundant greenery in the most picturesque Western Ghats, 3700 feet above sea level and home to one of the world's hottest biodiversity hotspots and River Hemavathi (major tributary of river Cauvery) is also a natural home to Sahyadri Project. The project has been uniquely conceived to be eco-friendly in the truest sense of the word and brilliantly executed to be in harmony with the natural pristine settings.

Further accentuating the eco-friendly aspect of the project is its location in an equally and inherently beautiful creation of nature – Sakleshpur. For those driving away from the pollution and congestion of Bangalore on the Bangalore-Mangalore highway, Sakleshpur is a breath of fresh air and utopia on earth.

The lush green coffee plantations, majestic and enchanting mountains, bubbling streams and a cool romantic weather welcome with open arms, ready to envelop everyone in its mystic and entrancing power. A greenery that never ends, air scented with the natural flora and free from pollution and a beauty that never ceases to inspire awe, soothe, calm and relax makes owning or vacationing at Sahyadri, at Western Ghats a culmination of dreams.
Vibez is a conglomerate of companies with diversified operations. Sakleshpur and Chikmagalur in Western Ghats is at the pivot of all operations. The company ideated as a business model for promoting Coffee Estates and farm houses. Till date, Vibez is credited with promoting over 250 acres of coffee estates and has assisted in building 60 farm houses and Farmhouse plots. Also, inclusive in its model are Pomegranate, Pepper and Banana estates in addition to Malnad Huts and EcoHomes.
The proverb rings especially true in the context of the indiscriminate construction that has upset the fragile ecological balance. Determined not to harm but positively contribute to the prevailing natural beauty and ecosystem, Vibez Eco Homes has prudently partnered with a reputed construction company who are market leaders in building Eco friendly homes.

Effort has been made to use naturally available materials and design the homes to judiciously use natural resources like sunlight and air. Reducing carbon footprint is high on the priority list and commendable work has been done at creating green communities - Green being the prime colour of the world and that which makes the world a beautiful place to live in.

The eco-friendly homes are low maintenance and have higher property value. Clean and positive environment promotes good health, well-being and offers quantifiable advantages in promoting social harmony as people are affected by the surroundings of the living spaces.
Advantages

The homes are socially, environmentally and psychologically laden with innumerable benefits.

**Advantages**

The USP of the project is the creation of a bio-diversity ecosystem of endangered plant species. Endangered plants around the globe will be identified and at least 4 or 5 of its kind will be planted. The work will be under the expert advice and guidance of Mr Nair, a state awardee for Environment.
First of its kind in India
Eco-friendly homes
Within easy reach of the 'Golden River'
Rain water harvesting
Solar energy instead of Electricity

**Social Advantages**
Improved quality of life
Less burden on local infrastructure
Enhanced comforts and good health

**Amenities**
- Club House with Gym and Indoor games
- Restaurant
- Children Play area
- Swimming PoolKids pool
- Jogging track
- Outdoor games like Badminton, Sand Volley
- Basket Ball and Kabaddi
- SPAHerbal
- ParkConference Hall for 200 people
- Boating in the River Kayaking in River Hemavathi
